bluepoint 4 ecocure
UV point source

System-Features
• Adjustable lamp output
• High power efficiency
• High intensity

Advantages
• Long lamp life
• Short curing time
• Low production cost
• Good price/performance ratio
• Ease of use
bluepoint 4 ecocure is an economical high-performance point source for all applications that need maximum UV intensity. Due to its high intensity, shortest cycle times can be realized.

A slide out module at the front panel of the housing ensures an easy replacement of the lamp. A user-friendly operation is possible through a touch-sensitive keypad.

**Lamp / shutter control**

The exposure time is selectable between 0.1 and 999.9 seconds. It is also possible to operate the shutter by a foot-switch or a dry contact.

The electrical lamp output can be adjusted in 1% steps from 60% to 100%. The unit memorizes operating hours and lamp running hours.

**Interfaces**

bluepoint 4 ecocure has an interface for a software update and a dry contact for an error signal.

**Additional features**

The parameter settings can be memorized on 6 storage locations and loaded when needed. The current parameter settings are maintained even after switching off the mains supply.

Error and warning messages are indicated at the display. Furthermore, bluepoint 4 ecocure has a standby function when the lamp is switched off.

Language of menu texts can be chosen between German, English, French and Italian. Three different filters are available to adapt the spectral output to the application.
**Applications**

bluepoint point sources are suitable for a large range of applications:

- Bonding, fixing or potting of components in the electronic, optical and medical-technical industry
- Fluorescent excitation for material testing; also suitable for automatic image processing
- High-intensity UV irradiation for chemical, biological and pharmaceutical purposes

**Light guides**

The following light guides are available:

- Single light guide with the diameters 3 mm, 5 mm and 8 mm
- Double, triple and quadruple light guides with a diameter of the single arms of 3 mm each
- Standard lengths of 1 m and 1.5 m
- Differing lengths on request
- Glas fiber optic
- different types of filters available, see spectrum
